# ORATAPE® MT82 Superflat Application Tape

## **Description**

Semi-transparent mounting paper with excellent layflat characteristics, good dimensional stability and high resistance to moisture, for the transfer of die-cut or computer-cut letters and symbols.

The special composition of the adhesive enables problem-free transfer of die-cut or computer-cut letters and symbols using both dry and wet bonding techniques. Due to its high dimensional stability, it is especially suitable for the transfer of large letters and symbols with precise positioning. This mounting paper is suitable for almost all well-known types of glossy or matt-finished films.

#### Note

Surfaces to which the material will be applied must be thoroughly cleaned and free from dust, grease or any contamination which could affect the adhesion of the material. Freshly lacquered or painted surfaces should be allowed to dry for at least three weeks and to completely cure. The compatibility of the selected lacquers and paints should be tested by the user, prior to the application of the material. Furthermore, the application information published by ORAFOL must be considered. The batch traceability according to ISO 9001 is possible on the basis of the roll number.

### IMPORTANT NOTICE

All ORATAPE® products are subject to careful quality control throughout the manufacturing process and are warranted to be of merchantable quality and free from manufacturing defects. Published information concerning ORATAPE® products is based upon research which the Company believes to be reliable although such information does not constitute a warranty. Because of the variety of uses of ORATAPE® products and the continuing development of new applications, the purchaser should carefully consider the suitability and performance of the product for each intended use, and the purchaser shall assume all risks regarding such use. All specifications are subject to change without prior notice.
